

abitex Terawall

Compared to an hourglass on the present's table
"Terawall" is projected in the future.

Encased in its simple sand grains there are projects,
innovation, new perspectives, respect for Earth and
love for life.

Acoustic and thermal insulation of tomorrow is there,
non-combustible Euro **class A1** (EN 13501) and
imo med Code 2010 part 1.

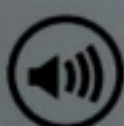

A **flexible cell panel** combining minimal thickness
and highest **acoustic and thermal insulation**,
"Terawall" is appropriate for the building, shipbuilding
and aeronautical industry and comply with your
interpretation of every architectural space.

Terawall in short:

- . no release of toxic fibres;
- . environmentally sustainable;
- . totally natural and **recyclable**;
- . **healthy** and safe for operators;
- . **non-combustible** A1 and IMO part 1;
- . moldable and flexible;
- . minimal thickness, highest insulation;
(35 / **39 dB** granted by 14 up to **21 mm**).

That's a bet placed by abitex srl,
exclusive distributor of Terawall.

We will be pleased to meet you at
CLERKENWELL DESIGN WEEK,
21st -23rd May 2019,
Design Fields,
Stand
DF31.
